Future Tech Ranked 12th Largest LI Software Company

Listing Reinforces IT Solution Provider as One of the Region's Top Performing Companies

HOLBROOK, NY --- Future Tech Enterprise, Inc. has been ranked #12 on Long Island Business News' Top Software Companies, it was announced today. With a 60,000 square-foot campus in Holbrook, Future Tech has grown from one entrepreneur's dream into a market leading full-service information technology solution provider representing over 700 different manufacturer product lines, including hardware, software and services – with partners like IBM, Cisco, Lenovo, HP, Dell, Toshiba and more.

“We couldn't be happier with Future Tech's ranking,” said CEO Bob Venero. “Especially when we are joined with heavy hitters like Northrop Grumman (1), CA (2), and IBM (3). This is a testament to how quickly we have grown from a start-up in my Long Island basement to one hundred employees and nearing one hundred million dollars in sales.”

Founded in 1996, Future Tech was named to the Top 10 Fastest Growing Private Companies on Long Island five consecutive years. The company was also named the Fastest Growing Member of the VAR500 and received the VARBusiness Ascension Award in 2005. Additional recognition includes three LISTnet Top Software Awards, #1 Rising Star in the IT Industry by Computer Reseller News, Top Overall Reseller Award from NASBA, IBM #1 PC Partner in the Americas, IBM Beacon Award, VAR of the Year Award, HP #1 Regional Growth Partner, Cisco Channel Customer Satisfaction Excellence, and several Top Techie of the Year Awards.
