

Asset Recycling Services

While some states are implementing a collection fee to cover computer hardware recycling costs at the end of the life-cycle, what can you do about the piles of outdated and unusable hardware taking up valuable space in your warehouses and offices? It can be perceived as unethical to throw it in a dumpster, but trying to sort out the recyclable parts can drain your resources.

You need a reliable way to dispose of outdated hardware and systems, and Future Tech can help with our series of comprehensive IT Asset Disposition Solutions that are designed specifically to mitigate the various liabilities associated with technology.

Data Destruction Services

Every year, your company has to worry about tighter government regulations mandating privacy of customer and patient information, and the increasing penalties that are possible if as little as one file is compromised. Broad-scale identity theft is happening when leased IT assets are en route to renovation or remarketing, which is why there is a rising demand for the safe and thorough cleansing of hard drives when assets reach end-of-life or end-of-lease. You have an ethical obligation to your clients and stakeholders to properly destroy all personal and propriety information when discarding or transferring ownership of old computers. After all, you don't want your mission-critical data getting into the wrong hands.

Future Tech offers a series of comprehensive IT Asset Disposition Solutions designed specifically to mitigate the data liabilities associated with technology. Our mobile IT lab arrives at your office and utilizes a business practice that meets the stringent requirements of the US Department of Defense (5220.22M Compliant Standard) and handles the physical removal and destruction of all storage devices within technological assets. When our customers select these services, all of the liabilities associated with data are assumed by Future Tech, including:

- HIPAA Compliant Data Destruction
- Sarbanes-Oxley Compliant Destruction & Reporting
- Gramm-Leach-Bliley Compliant Data Destruction
- Disk, Tape & Cartridge Destroy Solutions

ASSET RECYCLING

RecycleToday Disposition Solutions

The RecycleToday suite of services is available to help manage your disposition requirements. These ondemand services and solutions meet your immediate requirements and ensure a timely response, a thorough collection of assets, simplified reporting and cost-effective business strategy, including:

- National Processing Centers
- Managed Pack & Ship Logistics
- Comprehensive Audit, Inventory & Reporting
- Remarketing Services (to Offset Services Costs)
- Direct Disposal Services (Reduced Cost Disposal)
- Data Destruction Services
- Donation Processing
- Lease Return Processing
- Employee Resale Programs
- EPA/DEP Approved Recycling Services

Environmental Service and Solutions

Realizing that such IT products as CRT monitors and UPS power systems are classified as hazardous waste by the Environmental Protection Agency (EPA) and other regional laws directly impact organizations on IT products, it is essential that organizations protect themselves from fines, fees and other related losses due to this environmental threat. We offer:

- Managed Pack & Ship Logistics
- Full Auditing & Reporting
- Purchase Credit for Working Systems
- Transfer of Title/Ownership of Asset
- Environmental Processing Documentation
- Zero Landfill Policy

RecycleTomorrow® Planned Disposition

The most cost-effective asset disposition solution available today, RecycleTomorrow services are purchased in tandem with new IT assets and a services contract covers all of the costs associated with the eventual disposition practice. With a little planning, customers can realize as much as a 75% cost reduction compared to the RecycleToday Services Solution and other competitive disposition vehicles.

RecycleTomorrow contracts can cover all costs, including but not limited to logistics, processing, disposal, data destruction and the following:

- National Processing Centers
- Included, Managed Pack & Ship Logistics
- Comprehensive Audit, Inventory & Reporting
- Remarketing Eligible (Value Back)
- Optional Data Destruction Services
- EPA/DEP Approved Recycling Services
